

# Declaration of Compliance

Description	Material	Article Number
Trays, forms, lids	PP	

Duni declares that the article meets the requirements of:

- Article 3, 11(5), 15 and 17 of Regulation (EC) No 1935/2004 (Framework regulation)
- EU Regulation 2023/2006/EC (GMP)
- EU Regulation 10/2011/EC with amendments (Plastic regulation)
- EU Regulation (EU) 2024/3190 on the use of bisphenol A (BPA) and other bisphenols
- Article 5 of Regulation (EU) 2025/40 on Packaging and Packaging Waste (PPWR) regarding the restriction of per- and polyfluoroalkyl substances (PFAS)

This plastic product has been manufactured only with monomers, other starting substances and additives that are authorized under Regulation (EC) 10/2011 and all amendments. A risk assessment according to Article 18 and Article 19 of Regulation (EC) No. 10/2011 has been performed for this product.

## Overall migration (1)

According to the above mentioned regulations, the overall migration does not exceed 10 mg/dm<sup>2</sup> or 60 mg/kg.

## Specific migration (2)

The product does not contain any monomers or additives with any specific migration limit according to regulation 10/2011/EC.

## Area of use

The articles can be used safely with all types of food under following conditions:

	Application	Specific conditions	
		Temperature (°C)	Period food contact
<input type="checkbox"/>	Storage in freezer*	-40 to 0	Very long (>> 10 days)
<input type="checkbox"/>	Storage in fridge	0 to 10	Long (> 10 days) The food itself probably sets the limitation
<input type="checkbox"/>	Storage at room temperature	Max 40	Long (> 10 days) <i>As long as the food are considered safe to consume and with kept desired quality.</i>
<input type="checkbox"/>	Keeping warm applications	< 70	< 2 hours
<input type="checkbox"/>	Hotfill & serve temp	< 121	Immediate use <i>The material has been evaluated at high temperature conditions corresponding to temperature application to 121°C (see Test conditions) However, because of deteriorating performance and stability as well as the risk of burn injuries, use at this temperature should be handled with utmost care.</i>
<input type="checkbox"/>	Microwave oven		Short (< 2 h) <i>Be aware different microwave ovens may heat unevenly and can create hot spots causing the plastic to lose stability. Always remove it with care to avoid burn injuries.</i>
<b>No</b>	Conventional oven	< 220	<i>The trays are <b>not</b> suitable for use in conventional oven.</i>

For further details, please read the product information sheet.

## Test conditions

Migration tests on the material of the article performed by an independent institute showed that under the following test conditions overall migration (see 1.) and specific migration (see 2.) fall below the respective limits given by regulation 10/2011.

*Overall migration OM5*

*3% Acetic acid 10 days at 40°C and 2 hours at 100°C  
10 % Ethanol*

*10 days at 40°C and 2 hours at 100°C  
20 % Ethanol*

*10 days at 40°C and 2 hours at 100°C  
50 % Ethanol*

*10 days at 40°C and 2 hours at 100°C  
95 % Ethanol*

*10 days at 40°C and 3,5 hours at 60 °C  
Isooctane*

*2 days at 20°C and 1,5 hours at 60°C*

*\*corresponding standard testing conditions in 10/2011*

Ratio of food contact surface area to volume of component used to establish the compliance of material is 6 dm<sup>2</sup>/kg.

The trays comply with the general restrictions of Regulation (EC) No. 10/2011 Annex 2 regarding heavy metals and PAA content.

The material does not contain any dual use additives (i.e. food additives or flavorings) subject to restrictions or specifications under Article 11.3 in EU Regulation 10/2011/EC (Plastic regulation).

Please be advised that Duni AB does not add anything into the product.

This document of compliance is based on:

- Documentation from suppliers
- Migration analysis
